

Level 26: Annual Battery UPS Service

- All services perform from PM Level 25 plus the following:
- Check all nuts, bolts, screws and connectors for tightness and heat discoloration
- Perform operational test of system by transferring critical load to bypass mode
- Measure and record all low-voltage power supply levels
- Calibrate and record all electronic control circuits to systems specifications
- Remove dust from circuit cards and other sensitive components and vacuum dust and/or debris from inside the system cabinet
- Recommended once every 12 months

SURESTART Service is a Quinn preventive maintenance and inspection program, custom designed to help reduce power system operating costs, prolong component life, and increase the overall reliability of your equipment.
